ExpoForm800

An innovation in portable,
self-build exhibition systems

What makes ExpoForm800 so different from other stands?

Not only does ExpoForm800 look stunning, but this innovative display system is also incredibly portable, simple and quick to set-up without the need for any tools, allows cost effective updating of your graphics and has the capability to be easily adapted to fit perfectly into virtually any space you might book at your different events.

You can simply add more framework sections and accessories to your stand as your requirements grow over time, making it a truly future-proof stand investment.

The modular framework allows you to easily add or remove sections of your display, so you can adapt the overall stand size to fit perfectly into the space you have booked at the venue.

ExpoForm800 offers you a wealth of accessories that integrate seamlessly into your stand including: TV Screens, iPad holders, table attachments, product display shelving, brochure holders and storage areas.

The fully flexible framework allows you to create a stand layout of virtually any shape.

With its innovative finger operated fast-clamp locking mechanism, the complete display framework is quick and easy to set-up by a single person without the need for any tools, making it a very user-friendly system.

ExpoForm800 graphics roll-up and fit into a compact storage case which attaches to the hardware case for safe and easy manoeuvring to and from your vehicle.

The ExpoForm800 system is compact enough to fit into wheeled cases which have been designed to be transported in the boot of a standard size car.

All ExpoForm800 accessories are supplied in custom transport cases to ensure your display remains in perfect condition for use time and time again.

Do you exhibit at European shows?

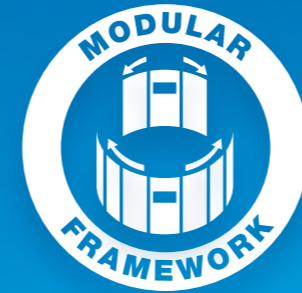

Due to the compactness of the ExpoForm800 system, the transport costs are kept to a minimum, which makes it a perfect solution for those companies who also exhibit overseas at European events and want to set-up the stand themselves to avoid additional contractors charges.

We can supply robust wheeled flight cases, for you to pack your complete stand into, to keep it protected during the logistics process.

One stand. Infinite design possibilities.

Unlike most other portable display systems which are fixed in both their shape and size, ExpoForm800's fully flexible framework allows you to create a stand layout of virtually any shape. This enables it to be set-up to fit perfectly into any size of space you book at each event.

Easily adapt the size of your display to fit perfectly into different stand spaces.

The modular framework allows you to easily add or remove sections of your display, so you can extend or reduce the overall size of your stand to fit perfectly into the space you have booked. This adaptability allows you to develop your stand over time as your requirements change, thus making ExpoForm800 an attractive, future-proof and therefore cost effective stand investment.

6 modules in a subtle wave design to create a stand to fit across a 5m wide space.

The same 6 modules have now been flexed into a corner layout to fit within a 3m x 3m corner space.

A simple 5 module stand set-up to fit a 3m x 2m corner space.

2 additional framework sections have been added to extend the stand to fit within a 4m x 3m corner space.

Integrate a range of accessories to provide additional functionality

ExpoForm800 offers you a wealth of functional accessories that integrate seamlessly into your stand including: TV Screens, iPad holders, table attachments, product display shelving, brochure holders and storage room doors.

Frosted acrylic brochure holders

Oval product display shelving unit
with integrated LED lighting for each shelf

Recessed slatwall product display unit
with integrated LED downlights

Flush fit slatwall product display panel
(range of product display fixings)

Circular plinth unit
with internal storage

Free stand design & visuals

As ExpoForm800 is fully customisable to suit your specific requirements in terms of size, shape and functionality, we will produce a free CAD drawing and full colour visual of your proposed stand design so you have complete peace of mind of exactly how your stand will look, prior to placing your order.

We can also show you how your stand can be adapted to work in other stand spaces, which you may have booked at forthcoming events, so you can fully understand its long-term potential.

Photograph of the completed stand in our pre-build area

“ The ExpoForm800 is so adaptable that it can be flexed into whatever shape we require, but in addition we can add or remove sections such as the literature stand, TV screen and keyboard table, depending on the space we have available at each of our events; yet no matter how we use it, the stand still looks as though it has been designed that way. The advice we received from LoveExpo was just what we needed; they took the time to listen to what we wanted to do and how we planned to achieve it, then used their knowledge and experience to guide us to the ideal display solution for us. We have already turned to LoveExpo for other kinds of event displays and will definitely continue to do so. ”

Bob Bissell
BT Business

Happy customers

Here are just a few testimonials from satisfied clients who are now enjoying all the benefits that the ExpoForm800 system has to offer.

“ The Renovotec brand is key to our business, so we needed a stand that would effectively promote it for us at exhibitions and reflect our professionalism. The ExpoForm800 was ideal, providing a sleek, quality seamless graphic wall as a backdrop, with integrated functionality to keep the finished stand looking clean, uncluttered and practical. ”

We received professional in-depth guidance, advice and service from LoveExpo and look forward to working with them on future projects.

Richard Gilliard, Managing Director, Renovotec

“ We unpacked our ExpoForm800 stand this week and were blown away by the quality of its design and construction. It's easy to assemble, light and efficient to transport and looks amazing. What's more the team at LoveExpo could not have been more helpful. ”

We've had a number of different exhibition display systems over the years but this stands out - our only regret is that we didn't find them before!

Tim James, Co-Founder
SchoolBlazer

“ The stand is easy to assemble, portable and versatile. Our customers and even competitors have commented upon how striking our new stand looks and it has certainly given us the edge we wanted at our trade shows. ”

Francis Ashcroft
NorthernCare

“ LoveExpo were an integral part of our production process in delivering a multi-functioning and flexible exhibition system for one of our valued clients, BAE Systems Submarines. Our challenge was to provide BAE Systems with a solution that was fit-for-purpose, cost-effective and produced within a 3 week window. The deadline was met, we loved the final product and more importantly the client was very happy indeed. Another great job produced by LoveExpo for Forepoint. ”

Steve Gill, Director
Forepoint

If you are interested in the **ExpoForm800** get in touch.

If you would like to know more about the ExpoForm800 system, please get in touch with us today. We are ready to offer advice and take you through the steps needed to create a tailored exhibition stand that meets perfectly with your requirements.

Our Aim

Our aim is to help you improve the visitor experience on your stand, by suggesting ways to make it more engaging, more professional and ultimately more memorable.

We ensure your exhibition stand makes the right first impression and provides you with the necessary functionality to meet with your show objectives.

Because we are so confident that you will love your ExpoForm800 display system, we offer a 100% satisfaction guarantee with every stand purchase.

When you purchase your ExpoForm800 system from us, we want you to be 100% satisfied with your new stand. Therefore, if for any reason you are not 100% satisfied with your display system; because you feel it doesn't meet the level of functionality and quality in which it was advertised, then simply return the system back to us, in its original condition within 7 days of purchase along with your reasons for doing so and we will issue you with a no quibble full refund.
